

it's
• about
time!

It's about the time your health-care professional spends with you and your family. About taking the time to answer your questions. *All* your questions. About getting to know you over time.

With advanced nursing degrees and extra training and experience, nurse practitioners are helping Canadians get more access to quality health care. In community clinics, health-care centres, doctors' offices, nursing homes and emergency departments, nurse practitioners diagnose and manage illnesses like diabetes, order and interpret tests, write prescriptions and a whole lot more.

Visit npnow.ca and tell your government that you want more health-care options, that you want more nurse practitioners in your area.
